I am a creative and empathetic professional, always looking to learn and take on new challenges. My main goal is to grow both professionally and personally, and my focus is on team collaboration.

My strong knowledge spans the front-end stack, including technologies such as **NextJS, ReactJS, React Native, Redux, JavaScript, TypeScript, TailwindCSS, CSS3+** and **HTML5**. Also, right now, I'm spending time learning **AWS** to become Practitioner certified.

On the back-end front, I have an advanced command and understanding of **NodeJS, SQL, Express, GraphQL, PostgreSQL and ArangoDB**. I am proficient in the SCRUM methodology and other agile methodologies, which allows me to work effectively in development teams and projects.

My passion for technology and my constant desire to improve motivate me to continue growing and expanding my skills in the world of software development.

Skills

Javascript Typescript NextJS ReactJS React Native Redux Redux Toolkit NodeJS

AWS HTML5 CSS3 TailwindCSS Express SQL GraphQL ArangoDB

Other skills

Figma Illustrator Git WordPress Data Structures Atomic Design Docker

WORK EXPERIENCE

FULL-STACK DEVELOPER | Airbits Tech | September 2023 - Present

I play a fundamental role in the creation and maintenance of management systems and customized websites for large companies in the region. My focus has been on the implementation of efficient and highly functional technological solutions with technologies: **React, Redux, Javascript, NodeJS, GraphQL** and **ArangoDB** as a database.

FULL STACK TEACHER ASSISTANT | HENRY | ABRIL 2023 (34 weeks)

Integration of Full-Stack students for 8 months as a work team... Assignment of tasks, planning of activities to develop ingenuity and technological training throughout the boot camp. (JavaScript, CSS 3+, HTML 5, React, Redux, Webpack, NodeJS, SQL, Express).

Role exercised:

- Management of groups of 8 to 12 people.
- Providing +200 hours of technological skills classes to students.
- Provide assistance in solving exercises and encourage teamwork.
- Suggest ideas and provide activities to improve boot camp processes. Promote collaboration and build community among students.

FRONT-END DEVELOPER | Wanderlust | JANUARY - AUGUST 2023 (5 weeks)

Web application for travel agencies with the aim of speeding up the sale of tours and activities.. (JavaScript, React, Redux, Tailwind, Firebase, Google Auth, Pago PayPal, Nodemailer, Cloundinary)

Role exercised:

- Creation and development of the website from scratch to completion, in collaboration with a team of 8 people in total, with a focus on the interface.
- Resolution of conflicts and approval of pull requests in code mergers.
- Contribution to the implementation and improvement of the shopping cart, payment gateway integration and route protection.
- Involvement in aspects of design and user experience in the frontend.
- Supervision and resolution of problems related to the display and performance of the website.

SALES MANAGER | GENTAR SRL | 2017 - present

Lead the sales team at the GENTAR SRL Distributor, supervising a team of 8 salespeople. My role focuses on the planning, coordination and execution of sales strategies. Through a leadership approach, to enhance team performance and ensure compliance with established sales targets.

Projects:

FULL-STACK DEVELOPER | RICK AND MORTY APP | JANUARY -AUGUST 2023

I designed and developed a complete website as an integrative project for the boot camp, allowing you to search for any character in the series and show their details, as well as add and delete them as favorites.

I used JavaScript, React.js, TailwindCSS, HTML5, CSS3+, Express, NodeJS, PostgreSQL and AWS Cognito technologies for user authentication.
